

## DBK Surface Dryer with optional Assembly Rack

The DBK Surface Dryer with optional Assembly Rack is a heater specifically designed to dry surfaces such as walls and floors resulting from damage caused by flooding or humidity.

The DBK Surface Dryer removes water using an efficient technology thereby the low working temperature gradually dries surfaces avoiding cracking. The low power ensures that operating costs are kept low. The surface temperature of the drying surface is ca. 80°C and of the accessible top side ca. 40°C.

**Dimensions:** 780 x 510 x 40 mm, **Weight:** 9 kg approx

### Option: Feet

The DBK Surface Dryer can be used to dry floors by laying it flat or, with the optional feet, can be used to dry walls by standing it vertically.

**Dimensions:** 200 x 30 x 30 mm, **Weight:** 400 g approx

### Characteristics

- Reliable and quick drying
- Gradually drying action prevents cracking of wet walls
- Low operating costs due to the rating of 230V/300W
- Non-slip and accessible surface
- No burning hazard
- Tested according to IP44
- Double integrated temperature control

## System for DBK Mounting Rack

The mobile Mounting Rack will accommodate up to five surface driers maximum, stacked vertically allowing access to heights up to 2,0m, 2,60m and 3m. In this way damage caused by flooding or humidity can be dried quickly and easily. The total heating power with five assembled surface driers is 230V/1,5 kW.

### System for Mounting Rack

**Dimensions:** 920 x 850 x 2850mm, **Weight:** 32kg approx
